

REFERENCES

References

References should be numbered in square brackets (for example: [5], [7-9], [5, 13]) and listed at the end in the order of appearance in the text. Unpublished or submitted manuscripts should not be included in the reference list. When there are more than three authors, then the three author's name should be mentioned followed by 'et al'. Journal names should be abbreviated according to Chemical Abstracts. Authors are fully responsible for the accuracy of the references.

Web links and URLs should be included in the reference list. They should be provided in full, including both the title of the site and the URL.
